DETAILED ACTION

Specification

The abstract must appear on a separate page. The specification should not refer to the claims. Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Sandvik (6042027). There are channels 14, 16, and 18 leading to three groups respectively, different nozzles (figure 4), and regulating mechanisms V1-V6. The recitations of “especially the intake air of a piston engine” and “against/same direction of flow of the intake air” are deemed merely matters of intended use because the combination of the spray head in the intake manifold has not in fact clearly been claimed.

Claims 1 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Goodman (4459943). Figures 1 and 4 show a spray head with two nozzles and two passages 80, 82 leading thereto, a reservoir 68 for water, and an intake manifold 14.
